**MARRIOTT INTERNATIONAL, INC.**  
**EXPLANATION OF NON-GAAP FINANCIAL AND PERFORMANCE MEASURES**

In our press release and schedules, and on the related conference call, we report certain financial measures that are not required by, or presented in accordance with, United States generally accepted accounting principles (“GAAP”). We discuss management’s reasons for reporting these non-GAAP measures below, and the press release schedules reconcile the most directly comparable GAAP measure to each non-GAAP measure that we refer to. Although management evaluates and presents these non-GAAP measures for the reasons described below, please be aware that these non-GAAP measures have limitations and should not be considered in isolation or as a substitute for revenue, operating income, income from continuing operations, net income, earnings per share or any other comparable operating measure prescribed by GAAP. In addition, we may calculate and/or present these non-GAAP financial measures differently than measures with the same or similar names that other companies report, and as a result, the non-GAAP measures we report may not be comparable to those reported by others.

**Adjusted Operating Income and Adjusted Operating Income Margin.** Adjusted operating income reflects revenues, excluding cost reimbursement revenue, and operating expenses, excluding reimbursed expenses and merger-related costs, charges, and other merger-related adjustments due to purchase accounting. Adjusted operating income margin reflects adjusted operating income divided by adjusted total revenues. We believe that these are meaningful metrics because they allow for period-over-period comparisons of our ongoing operations before these items and for the reasons further described below.

**Adjusted Net Income and Adjusted Diluted EPS.** Adjusted net income and Adjusted diluted EPS reflect our net income and diluted earnings per share excluding the impact of cost reimbursement revenue, reimbursed expenses, merger-related costs, charges, and other merger-related adjustments due to purchase accounting, the gain on the sale of our ownership interest in Avendra, and the income tax effect of these adjustments, as well as a state tax expense relating to our plan to remit a portion of the accumulated earnings of non-U.S. subsidiaries in the future and an adjustment to our provisional estimated federal and state Deemed Repatriation Transition Tax under the U.S. Tax Cuts and Jobs Act of 2017. We calculate the income tax effect of the adjustments using an estimated tax rate applicable to each adjustment. We believe that these measures are meaningful indicators of our performance because they allow for period-over-period comparisons of our ongoing operations before these items and for the reasons further described below.

**Adjusted Earnings Before Interest Expense, Taxes, Depreciation and Amortization (“Adjusted EBITDA”).** Adjusted EBITDA reflects net income excluding the impact of the following items: cost reimbursement revenue and reimbursed expenses, interest expense, depreciation (including depreciation classified in “Reimbursed expenses,” as discussed below), amortization, and provision for income taxes, pre-tax transaction and transition costs associated with the Starwood merger, gains and losses on asset dispositions, and share-based compensation expense for all periods presented.

In our presentations of Adjusted operating income and operating income margin, Adjusted net income, and Adjusted diluted EPS, we exclude transaction and transition costs associated with the Starwood merger, which we record in the “Merger-related costs and charges” caption of our Income Statements, and other merger-related adjustments due to purchase accounting, to allow for period-over period comparisons of our ongoing operations before the impact of these items. We exclude cost reimbursement revenue and reimbursed expenses, which relate to property-level and centralized programs and services that we operate for the benefit of our hotel owners. We do not operate these programs and services to generate a profit over the contract term, and accordingly, when we recover the costs that we incur for these programs and services from our hotel owners, we do not seek a mark-up. For property-level services, our owners typically reimburse us at the same time that we incur expenses. However, for centralized programs and services, our owners may reimburse us before or after we incur expenses, causing temporary timing differences between the costs we incur and the related reimbursement from hotel owners in our operating and net income. Over the long term, these programs and services are not designed to impact our economics, either positively or negatively. Because we do not retain any such profits or losses over time, we exclude the net impact when evaluating period-over-period changes in our operating results.

**MARRIOTT INTERNATIONAL, INC.**  
**EXPLANATION OF NON-GAAP FINANCIAL AND PERFORMANCE MEASURES**

We believe that Adjusted EBITDA is a meaningful indicator of our operating performance because it permits period-over-period comparisons of our ongoing operations before these items and facilitates our comparison of results before these items with results from other lodging companies. We use Adjusted EBITDA to evaluate companies because it excludes certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company's capital structure, debt levels, and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provisions for income taxes can vary considerably among companies. Our Adjusted EBITDA also excludes depreciation and amortization expense which we report under "Depreciation, amortization, and other" as well as depreciation classified in "Reimbursed expenses" and "Contract investment amortization" in our Consolidated Statements of Income (our "Income Statements"), because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. Depreciation classified in "Reimbursed expenses" reflects depreciation of Marriott-owned assets, for which we receive cash from owners to reimburse the company for its investments made for the benefit of the system. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies. We exclude share-based compensation expense in all periods presented to address the considerable variability among companies in recording compensation expense because companies use share-based payment awards differently, both in the type and quantity of awards granted.

**RevPAR.** In addition to the foregoing non-GAAP financial measures, we present Revenue per Available Room ("RevPAR") as a performance measure. We believe RevPAR is a meaningful indicator of our performance because it measures the period-over-period change in room revenues for comparable properties. RevPAR may not be comparable to similarly titled measures, such as revenues. We calculate RevPAR by dividing room sales (recorded in local currency) for comparable properties by room nights available for the period. We present growth in comparative pro forma combined company RevPAR on a constant dollar basis, which we calculate by applying exchange rates for the current period to each period presented. We believe constant dollar analysis provides valuable information regarding our properties' performance as it removes currency fluctuations from the presentation of such results.
